

THE ADVANTAGES OF RENTING RAYCO FORESTRY MULCHERS

When you work in a challenging industry, such as vegetation management, land clearing, or forestry, you need equipment that works as hard as you do. Rental equipment from Rayco is built to stand up to the most demanding job sites and work environments, and everything is tested and maintained to meet strict quality standards. You will get the latest productivity and safety technologies with options for state-of-the-art equipment monitoring and innovative automated controls.

Additional reasons to choose Rayco Forestry Mulcher rentals include:

- Industry-leading operator stations designed to increase comfort and reduce distractions and fatigue
- Powerful and fuel-efficient engines and power systems that lower costs and meet most U.S. EPA emissions standards
 - Easy to operate. Every piece of Rayco equipment was designed to be user-friendly for operators of nearly any background. With excellent visibility, comfortable, smooth, intuitive controls, adjustable control patterns, and more, Rayco machines are easy to use, so you can get your hard work done.
 - Quality and durability. Rayco machines are proven to be rugged and reliable.
 - Excellent support from Rayco 's world-class dealer network. Rayco and its dealers stand behind their products rental fleets included. Dealers are trained to service what they sell with stellar access to parts from hundreds of

T415 Forestry

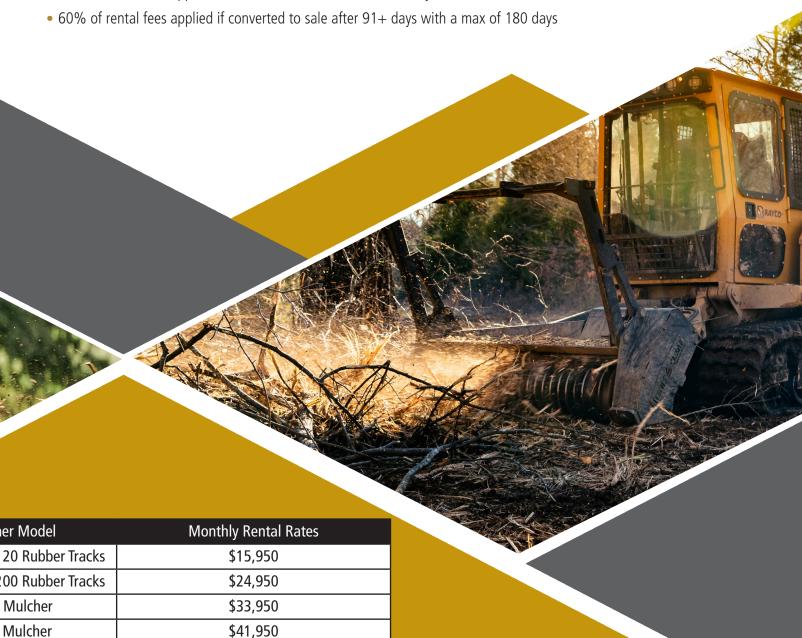

First month rent, 5% damage (Customer is responsible for all

- Easy to maintain. Rayco equipment is made to work hard to make your life easier.
- Built to perform. Rental customers know they can get more work done with Rayco. The machines are designed to do it all, and users appreciate their performance, power, cycle times, breakout, stability, and maneuverability.
- Safe and sound. Rayco forestry mulchers are well stocked with numerous safety features, including excellent visibility, easy machine entry and exit, safe and predictable controls, and more.
- Rayco Forestry Mulchers are available with either a Denis Cimaf DAF or DXF mulching attachment. The Denis Cimaf DAF
 mulching head is designed to perform at its best in sandy soils and the DXF mulching head is designed for more
 challenging rocky soils. We also have units that feature rubber or steel tracks.
